## ALUMNI ACHIEVEMENT

Sharing it with our chests filled with righteous pride, CSPA alumni, Major Jasmine Chattha received UN medals along with her female colleagues during this year's medal award ceremony for the Indian peacekeepers in Upper Nile. It is no secret that the Indian contingent contributing to the UN Mission in South Sudan (UNMISS) is best known for its efforts to repair and build essential infrastructure, but safeguarding civilians is also an essential and sometimes dangerous component of the mission. Our hearts are filled with pride and honor, knowing that Major Jasmine Chattha is touching the sky with her remarkable courage, and endearing actions.

*Congratulations!*

Harinder, Bachelor of Computer Applications (2018-21 batch), on being awarded a limited edition electronic challenge coin (C01N) by Singapore Government Technology Agency

Chitkara Alumni Association is proud to share that Harinder Singh, an Alumnus of Bachelor of Computer Application (2018-21 batch), is proving his mettle in the field of Ethical Hacking. He was recently awarded a limited-edition electronic challenge coin (C01N) by the Singapore Government Technology Agency (GovTech) as part of their ongoing efforts to ensure the cyber security of government internet-accessible applications used by citizens, businesses, and public sector employees. GovTech has established a vulnerability disclosure program (VDP) to encourage the responsible reporting of suspected vulnerabilities in IT services, systems, resources, and/or processes that may potentially affect government internet-accessible applications. He has already secured over 200 companies, including Google, Flipkart, Blackberry, BMW, and many others. The C01N is a powerful device equipped with Wi-Fi and Bluetooth capabilities and can be customized to suit your needs. With its Arduino kit-like features, the possibilities are endless. The device communicates via a UART interface with the ESP32-WROVER, and programming or flashing can be done using a Micro-USB cable. With these features, the C01N can be used for a variety of applications.

We wish Harinder all the very best in his future endeavors!
